Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/552,785	Applicant(s) LEE, SEUNG	
	Examiner LEE D. WILSON	Art Unit 3727	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because the abstract needs to be on a separate sheet of paper. Correction is required. See MPEP § 608.01(b).

Allowable Subject Matter

3. Claims 1-15 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: a hinge with the side creating a first zone and then second zone to that hinge of the first first zone with a roller connected to the second or upper end of the second zone, the roller having a connection perpendicular a stick at the upper end of the roller with a hinge above the roller. That is what is allowable and then the means for at the end points to the magnet .The means for is allowable. See the bolded language below.

- a. Claim 1. A floor mop capable of using both sides, wherein the floor mop comprises:

a supporting pad **10** on which velcro tapes **12** are attached so that each floor cloth is attached on

both surfaces, and having a rectangular planar structure;

a rotation section having

a first rotation zone 20 of which a lower part is hinge-combined at side portion of the supporting pad for being capable of rotating;

a second rotation zone 30 which a rotation incision portion is formed at a central part of an upper part thereof and is incised therein toward the direction of the length, and which a lower part thereof is hinge-combined at an upper part of the first rotation zone for being capable of rotating, thereby the second rotation zone is selectively attached on one of both surfaces of the supporting pad; and

a roller 40 which is oppositely connected to the rotation incision portion for being capable of rotating;

a connection member 60 which is formed perpendicularly with a center of the roller as a starting point, and which a stick 70 is hinge-combined at an upper part thereof; and

means **80** for fixing said one of both surfaces of the supporting pad at the rotation section so that the stick is capable of pushing and pulling collectively the supporting pad and the rotation section, said means for fixing being mounted at the rotation section and the supporting pad.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The 892 form discloses prior art being made of record.
